Designed for the safe storage of food and beverages in a healthcare setting.

20 Vaccine Carrier

Using solid state refrigeration this carrier can be plugged in to a power source in a vehicle. to keep vaccines cool.

Labcold also manufacture Refrigerators for human milk storage and Reagent Refrigerators

Labcold is a UK manufacturer of medical and scientific refrigeration, supplying refrigeration products to the NHS, laboratories and the British Army for over 40 years.

We work with our customers to ensure our products meet their exacting needs in terms of function and quality. That's why we were the first UK manufacturer to give our customers a 5 year parts and labour warranty* on our regular IntelliCold pharmacy range and the only UK manufacturer to achieve medical device accreditation, ISO 13485, for our blood bank refrigerators, plasma freezers, platelet agitator and incubator.

All Labcold products are manufactured in accordance with ISO 9001 quality management systems and are CE marked. We're also a UKAS temperature calibration laboratory #8898, providing you with a calibration service performed by people who don't just use traceable instruments but UKAS methodology too.

We also have a knowledgeable technical service team just a phone call away and a team of service technicians, trained by us, who can perform annual maintenance on your equipment.

**IntelliCold® range only*
